

DISCHARGE SUMMARY

Apollo Hospital, Mumbai

Patient Name:	Rajesh Kumar Sharma	Age/Gender:	39 Yrs / Male
Patient ID:	PAT-456789	Admission Date:	10/11/2024
Discharge Date:	13/11/2024	Total Stay:	3 Days

DIAGNOSIS

Acute Appendicitis with peritonitis

PROCEDURE PERFORMED

Laparoscopic Appendectomy under General Anesthesia

CLINICAL SUMMARY

Patient presented to emergency department with complaints of severe abdominal pain in right lower quadrant for 12 hours, associated with nausea and vomiting. On examination, patient was febrile (101.2°F) with tenderness and guarding in right iliac fossa. McBurney's point tenderness was positive. Blood investigations showed elevated WBC count (14,500/cumm). Ultrasound abdomen confirmed acute appendicitis. Patient was taken up for emergency laparoscopic appendectomy. Procedure was uneventful. Post-operative recovery was satisfactory.

CONDITION AT DISCHARGE

Stable, afebrile, wound healing well
